Abstract

This paper explores a ...

keywords: tax evasion, customs duties, non-tariff barriers, trading companies

1 Introduction

The original character string processed is: “hello world”.

Citations follow the [Rmarkdown](#) syntax as in Arbex and Mattos (2015) or, (Arbex and Mattos 2015). In Table 1 we present the number of characters in the original string.

Table 1: Hello world number of characters

String	# characters
hello world	11

Figure 1 shows the dependency structure of the current pipeline.
